

# FOR A BETTER PERSPECTIVE.

THE NEW myKOMBIVERKEHR-PORTAL.

Intermodal easily managed.

# TRANSPARENT AND EFFICIENT. EVERYWHERE.

In the new myKOMBIVERKEHR portal, we have taken our transport management and our cooperation with forwarding customers a step further. We are turning our claim of “intermodal easily managed” into reality by enabling particularly easy access to information and creating transparency in the transportation process, all with the greatest possible security when handling confidential transport data. After logging in, schedulers will have

all the tools required for day-to-day work in intermodal transport – from the latest timetables through transport information and bookings to real-time tracking data – in just one workspace. For every shipping order. At any time. From anywhere.

And with even more functionality in the future.

## Step into the new myKOMBIVERKEHR world!

Inform, plan,  
book, track.  
All in a single  
application.

Optimised  
information and  
data management.

At any time,  
from anywhere.

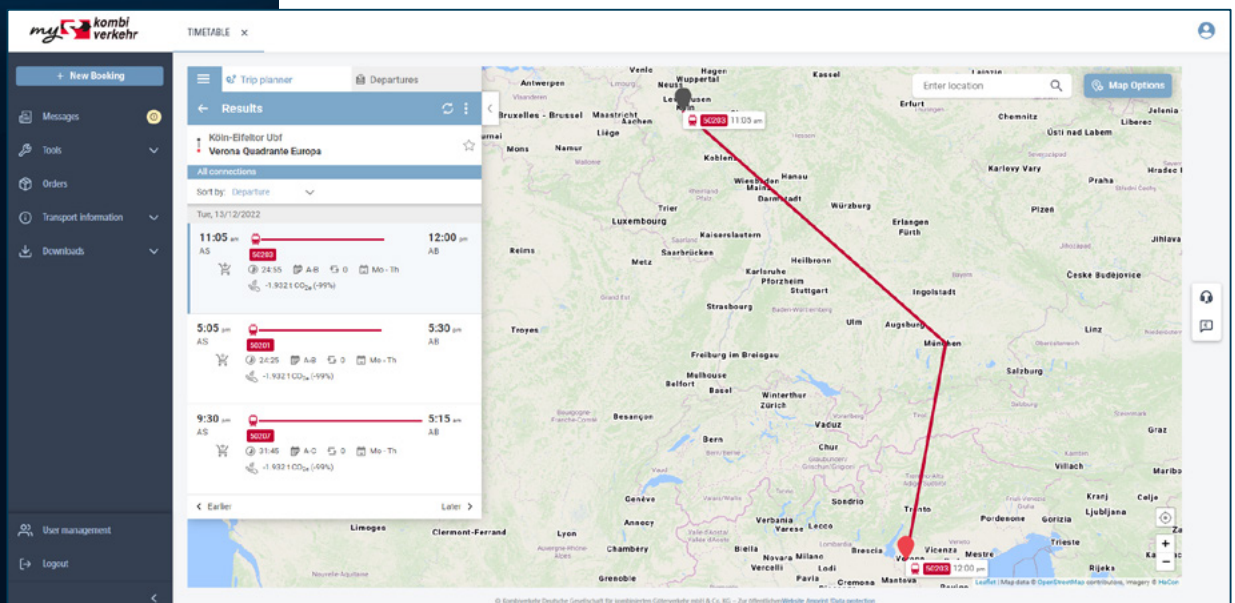

# FINDING CONNECTIONS MADE EASY.

## Timetable information

Intermodal transportation with Kombiverkehr means having the option of shipping trailers, containers and swap bodies on more than 15,000 routes in direct train and gateway services between Germany and Europe's economic centres. This huge range of intermodal connections can be presented on the new timetable web app – just enter the preferred route and the fastest, next available train will be displayed with all the key transport details. A new feature is the advanced search function with

special profile filters, which makes it easy to quickly find connections with P400 profile loading units, for instance. All connections that Kombiverkehr could offer in the network are presented, with those that you can book straight away marked with the shopping trolley symbol. For every connection displayed, the web app also automatically shows users the CO<sub>2e</sub> emissions, forwarders with company trains in addition to the standard products and Kombiverkehr's own trains.

The screenshot displays the 'my kombi verkehr' timetable web app. The main section is titled 'TIMETABLE' and shows search results for a trip from 'Köln-Eifelhof Ubf' to 'Verona Quadrante Europa'. The results are sorted by departure time and show three options:

- 11:05 AM AS to 12:00 PM AB, CO<sub>2e</sub> -1.932 t CO<sub>2e</sub> (-99%)
- 5:05 PM AS to 5:30 PM AB, CO<sub>2e</sub> -1.932 t CO<sub>2e</sub> (-99%)
- 9:30 AM AS to 5:15 PM AB, CO<sub>2e</sub> -1.932 t CO<sub>2e</sub> (-99%)

A map on the right shows the route from Köln to Verona, with a red line indicating the path. The interface also includes a sidebar with navigation options like 'New Booking', 'Messages', 'Tools', 'Orders', 'Transport Information', and 'Downloads'.

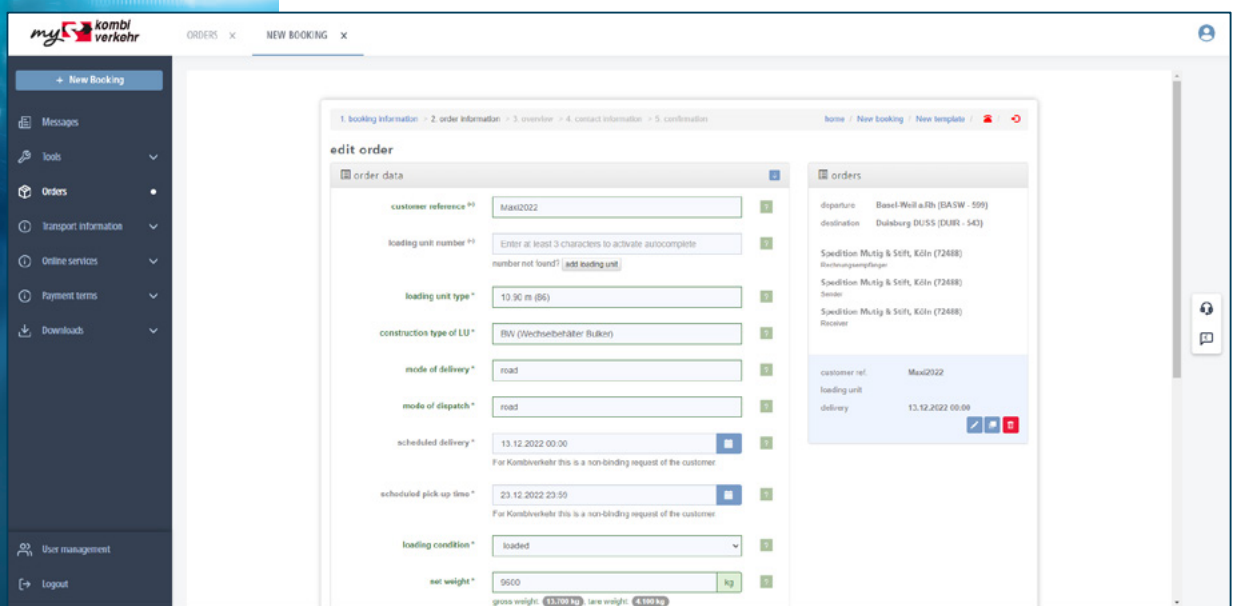

# SIMPLE AND INDIVIDUAL DISPATCHING.

## Online booking

You can make your bookings for shipping orders 100% digitally. Web services integrated into the online booking system ensure enhanced security when inputting data. Templates for bookings that you make frequently will save valuable time. In addition, every booking can be prepared, saved and then completed and sent at a later date.

All bookings made appear in real time in the order overview with the status "Recorded" and can then be seen and edited by all users in your company location. And the booking process is set to become even easier, faster and more transparent with Easy Booking – the next stage in the expansion of our online booking system. For even greater efficiency.

The screenshot displays the 'NEW BOOKING' interface in the my kombi verkehr system. The page is titled 'edit order' and shows a form for entering booking details. The form is divided into two main sections: 'order data' and 'orders'.

**order data**

- customer reference: Max2022
- loading unit number: (input field with placeholder: Enter at least 3 characters to activate autocomplete; member not found? [add loading unit])
- loading unit type: 10 90 m (86)
- construction type of LU: BNV (Wechselbehälter Bulker)
- mode of delivery: road
- mode of dispatch: road
- scheduled delivery: 13.12.2022 00:00 (Note: For Kombiverkehr this is a non-binding request of the customer)
- scheduled pick up time: 23.12.2022 23:50 (Note: For Kombiverkehr this is a non-binding request of the customer)
- loading condition: loaded
- net weight: 9500 kg (gross weight: 13,700 kg; tare weight: 4,200 kg)

**orders**

- departure: Basel-Weil aRh (BASW - 599)
- destination: Dalsburg DUS5 (DURR - 543)
- Specification: Mutig & Seif, Köln (72488)
- Rechnungsempfänger: Mutig & Seif, Köln (72488)
- Sender: Mutig & Seif, Köln (72488)
- Receiver: Mutig & Seif, Köln (72488)
- customer ref: Max2022
- loading unit: (input field)
- delivery: 13.12.2022 00:00

The interface includes a navigation menu on the left with options like 'Messages', 'Tools', 'Orders', 'Transport information', 'Online services', 'Payment terms', and 'Downloads'. The top navigation bar shows 'ORDERS x' and 'NEW BOOKING x'.

# OPTIMUM TRANSPARENCY.

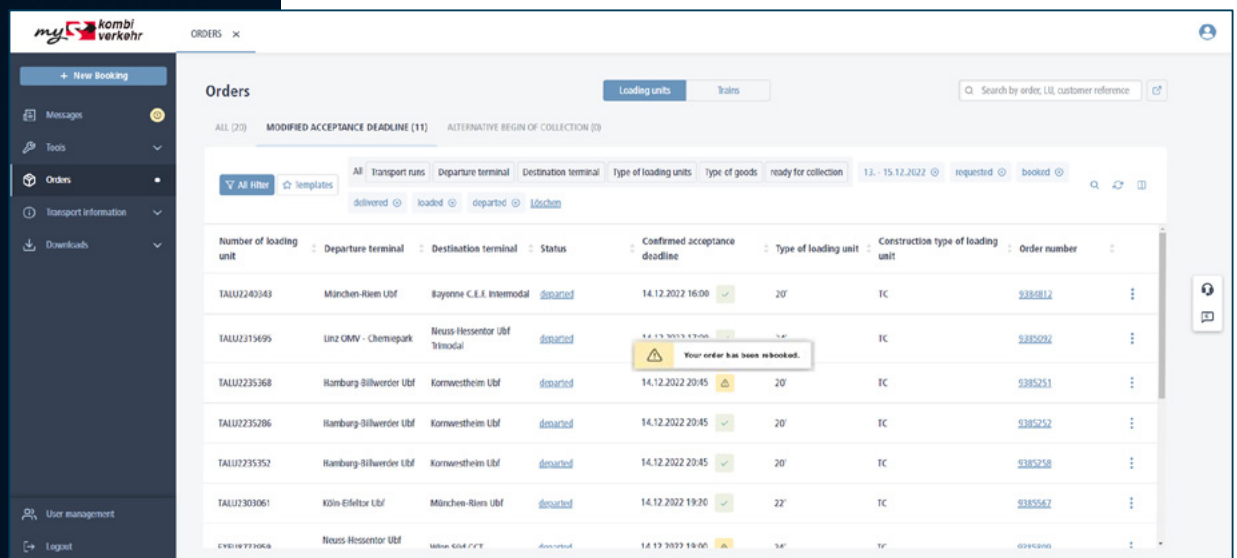

## Central order overview

The central order overview is the heart of the portal. All current shipping orders are listed under "Orders", while historic orders can be located quickly and easily using the search function. The display can be tailored entirely to the user's needs, e.g. based on loading units or trains or using the "My orders" filter. On the subject of filters, there is a huge number of them, enabling the search results to be confined to the orders that are especially relevant. More than 50 separate items of information can be displayed for every order. The column configurator

allows them to be enabled, disabled and displayed in different orders. Direct displays in each view ensure speedy notification of anomalies in the transport operation, while the removal of loading units and rebookings can be highlighted visually.

And anyone wanting to find particular shipping orders in their results list on the start screen when they come into work the next day just needs to enable their favourites in the filter templates. That's how simple it is.

Number of loading unit	Departure terminal	Destination terminal	Status	Confirmed acceptance deadline	Type of loading unit	Construction type of loading unit	Order number
TALU2240343	München-Riem Ubf	Bayern C.E.S. Intermodal	departed	14.12.2022 16:00	20'	TC	9388812

# TRACKING IN REAL TIME.

## Tracking shipments

Anyone shipping intermodally needs to know where their cargo is at any time – particularly given that trailers or containers cross several borders on their way across Germany and Europe, often passing through more than two terminals. Our transport monitoring and transport management teams do all that they can to make the best possible transport information available online in the order overview. We show the start

of pick-up and the estimated time of pick-up so that you have a rough idea of when your loading unit will be available to collect from the destination terminal. And until then, you will see the key tracking data for all shipping orders with “Departed” status: the “Latest checkpoint”, “Deviation on last track section” and “Expected delay” inform you of the current status of your loading unit. All in real time.

Latest Checkpoint	Relative position	Estimated Time of Pick-up	Expected delay
Krefeld 05.12.2022 23:15	40	06.12.2022 21:30	On Time
Pichl 05.12.2022 22:37	324	07.12.2022 09:20	17h:05min
Porz (Rhein) 05.12.2022 23:28	156	06.12.2022 14:30	2h:15min

# EVERYTHING AT A GLANCE.

## Transport information

User-friendly online applications are one thing, but information and valuable tips on the requirements for and process of transport are another. myKOMBIVERKEHR has all the data from A to Z that you need for your intermodal transport.

Compact, informative and always with additional material, every section also has its own support area, where you will find the relevant contact details, downloads, related topics and FAQs.
